

A RANGE OF PRODUCTS FOR THE HEALTH AND CARE SECTORS

SWANMAC HYGIENE SUPPLIES

We now hold a range of hygiene products in stock which are available on request. Please speak to a member of our sales team to find out more.

Face Masks and Protective Clothing

Protecting the facial area from splashes and sprays of fluid, face masks are an increasingly sought after product. Likewise, protective clothing covers the body so that an infection cannot be transmitted through or via clothing.

Disposable Gloves

Disposable gloves reduce the risk of cross-contamination by preventing pathogens from spreading by presenting a barrier from individual to individual or contaminated surfaces.

Hand Sanitiser

When it comes to the battle for infection control, readily available hand sanitiser helps to fight germs and maintain hygiene and cleanliness. When applied to the hands, sanitiser works to remove disease-causing organisms.

Disposable Wipes

Quickly on hand and easy to use, disposable wipes enable the speedy disinfection of surface areas that may cause cross-contamination.

SWANMAC LIMITED
